REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

1. Li et al, teaches that microwave irradiation is known to be used in the rapid and easy preparation of water-soluble chitosan oligosaccharides in an aqueous solution (see English Translation). Li et al. further teach that microwave irradiation may be possibly used in other fields of chitosan modification.
2. Yokota teaches the hydrolysis of aqueous chitosan in the presence of hydrochloric acid (an electrolyte; see English Translation).
3. However, both Li et al and Yokota do not expressly teach or suggest the irradiation of chitosan with microwave in the presence of an electrolyte such as NaCl.
4. According to Kolupaev et al. NaCl (an electrolyte) is known to assist invertase, an enzyme, in the hydrolysis of oligosaccharides at sub lethal concentrations (see English Translation). There is no teaching or suggestion in Kolupaev et al that the use of NaCl, in the absence of invertase, will cause the same hydrolysis of the oligosaccharides. Hence, there is no motivation seen to include an electrolyte like NaCl in the microwave assisted hydrolysis of chitosan.

Therefore, the combination of the prior art of record does not teach or render obvious the method of preparing low molecular weight chitosan oligosaccharides as instantly claimed.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
